This listing of claims will replace all prior versions, and listings of claims in the application:

**Listing of Claims:**

14. A kit for treating MCI in a human, the kit comprising:  
a specific glucocorticoid receptor antagonist; and,  
an instructional material teaching the indications, dosage and schedule of administration of the glucocorticoid receptor antagonist to a patient with mild cognitive impairment who is 45 years or older and has normal levels of cortisol for that age, wherein the patient:
  - (i) obtains at least one perfect score on the Folstein Mini Mental Status Exam in three administrations of said Exam;
  - (ii) receives a rating of 0.5 on the Clinical Dementia Rating Scale, and
  - (iii) scores 1.5 or more standard deviations below the age- and education-adjusted normal value on a paragraph recall test.
15. The kit of claim 14, wherein the instructional material indicates that the glucocorticoid receptor antagonist can be administered in a daily amount of about 0.5 to about 20 mg per kilogram of body weight per day.
16. The kit of claim 14, wherein the instructional material indicates that the glucocorticoid receptor antagonist can be administered in a daily amount of about 1 to about 10 mg per kilogram of body weight per day.
17. The kit of claim 14, wherein the instructional material indicates that the glucocorticoid receptor antagonist can be administered in a daily amount of about 1 to about 4 mg per kilogram of body weight per day.

18. The kit of claim 14, wherein the glucocorticoid receptor antagonist is mifepristone.
19. The kit of claim 14, wherein the mifepristone is in tablet form.
